

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

Notes to the financial statements

For the financial year ended 30 June 2017

1. The reporting entity

SC ARTEGO SA TG-JIU, (Society) is established in 1991 and operates in Romania in accordance with the provisions of Law 31/1990 on the commercial companies and Law 297/2004 on the capital market.

The company is based in Ciocarlau Street, no. 38 , Tg-Jiu, Gorj county.

According to the statute, the main activity of the company has the CAEN code 2219 - "Manufacture of other rubber products".

The record of the shares and the shareholders is kept under the conditions of the law by the Central Depository.

2. Basics of drawing up

(a) Declaration of conformity

The separate financial statements have been prepared in accordance with the International Financial Reporting Standards ("IFRS") adopted by the European Union and in accordance with the provisions of OMF 2844/2016 with subsequent amendments and completions.

The Company applies International Financial Reporting Standards as approved by the European Union at the preparation of the separate financial statements ended 30 June 2017, in accordance with OMF no. 881/2012. This order states that starting with the 2012 financial year, the annual financial statements will be drawn up in accordance with the IFRS, this order being applicable to the companies whose securities are admitted to trading on a regulated market.

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

The Company's accounting records are maintained in RON in accordance with the Romanian Accounting Regulations ("RCR"). These accounts have been restated to reflect the differences between RCR and IFRS accounts. Accordingly, RCR accounts were adjusted, if necessary, to harmonize these separate financial statements in all material respects, with IFRS.

(b) Presentation of the financial statements

The separate financial statements are presented in accordance with the requirements of IAS 1 "Presentation of Financial Statements".

(c) The basics of evaluation

The separate financial statements are carried at historical cost, except for certain classes of property, plant and equipment that are revalued.

The share capital is adjusted according to the International Accounting Standard ("SIC") 29 ("Financial Reporting in Hyperinflationary Economies") until 31 December 2003.

The management believes that the Company will operate in the predictable future and, in the long run, the application of the business continuity principle in the preparation of the financial statements is considered appropriate. The separate financial statements are presented in accordance with the requirements of IAS 1 "Presentation of Financial Statements". The Company has adopted a liquidity-based presentation in the balance sheet and a presentation of income and expenses by nature in the profit and loss account, considering that these disclosures provide information that is more credible and relevant than those that would be presented.

(d) Functional and presentation currency

The company's management considers that the functional currency, as defined by IAS 21 "Effects of Foreign Exchange Rates", is LEI or RON. The separate financial statements are presented in RON, rounded to the nearest leu, the currency that the company's management chose as the presentation currency.

(e) Using estimates and judgments

The preparation of the financial statements in accordance with IFRS adopted by the European Union involves the management's use of estimates, judgments and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income and expenses. The estimates and assumptions associated with these estimates are based on historical experience as well as on other factors considered reasonable in the context of these estimates. The results of these estimates form the basis of judgments relating to the carrying amounts of assets and liabilities that can not be obtained from other sources of information. The obtained results may differ from the values of the estimates.

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

The estimates and assumptions underlying them are periodically reviewed. The revisions of the accounting estimates are recognized in the period in which the estimate is reviewed if the review affects only that period or the period in which the estimate is reviewed and the future periods if the review affects both the current period and future periods.

The judgments made by management in the application of IFRS have a material effect on the financial statements and estimates that involve a significant risk.

3. Significant accounting policies

The accounting policies presented below have been applied consistently over all periods presented in these separate financial statements.

(a) Branches and associated entities

The subsidiaries are entities under the control of the company. The control exists when the company has the power to direct, directly or indirectly, the financial and operating policies of an entity to obtain benefits from its business. The associated entities are those companies in which the company may exert a significant influence, but not control over financial and operational policies.

The company does not have associated companies.

(b) Transactions in foreign currency

The operations denominated in foreign currency are recorded in RON at the official exchange rate at the settlement date of the transactions. The monetary assets and liabilities recorded in foreign currency at the balance sheet date are translated into the functional currency at the exchange rate on that day. The interests or losses from their settlement and from conversion using the exchange rate at the end of the month or at the end of the financial year, of monetary assets and liabilities denominated in foreign currency are recognized in the income and loss statement.

(c) Financial Instruments

Financial risk management

The company is exposed to the following risks arising from financial instruments: market risk (interest rate risk and foreign exchange risk), credit risk and liquidity risk. The company's management focuses on the unpredictability of the financial market and seeks to minimize the potential adverse effects of the company's financial performance. The market risk is the risk that causes changes in market prices as well as currency exchange and interest rate that will affect the company's revenues.

SC ARTEGO SA

Explanatory Notes drawn up at 30 june 2017

(All amounts are expressed in RON, unless otherwise specified)

The company has no formal commitments to combat financial risks. Despite the absence of formal commitments, the financial risks are monitored by the company's management, focusing on the society's needs to effectively address opportunities and threats.

Interest rate risk

The company's operating cash flows are affected by interest of the rate fluctuations, mainly due to the borrowing in foreign currency contacted by the financing banks.

The cash risk of the interest rate is the risk that the interest, and hence the expense, fluctuates.

Currency risk

The company may be exposed to the exchange rate fluctuations through cash and cash equivalents, trade receivables or trade payables denominated in foreign currency.

The currency used on the domestic market is the Romanian leu. The company is exposed to foreign currency cash and cash equivalents, purchases and borrowings made in a currency other than that used on the domestic market. The currencies that expose the company to this risk are mainly EUR, USD, and GBP. The foreign currency loans are subsequently denominated in RON, at the exchange rate of the banking day of each month, communicated by the National Bank of Romania. The resulting differences are included in the income and loss statement.

The credit risk

The credit risk is the risk that the company will incur a financial loss as a result of non-fulfillment of the contractual obligations by a client or a counterparty to a financial instrument, and this risk arises mainly from trade receivables and cash and cash equivalents.

On 30 june 2017, the company holds cash and cash equivalents in the amount of 8.095.711 lei. The cash and cash equivalents are held at banks including: Unicredit ,Intesa,ING Bank,Credit Europe, Garanti,BRD.

The liquidity risk

The liquidity risk is the risk that the company encounters difficulties in meeting the obligations associated with financial liabilities that are settled in cash or by the transfer of another financial asset.

A prudent liquidity risk management policy involves maintaining sufficient cash and cash equivalents, availability of funding through appropriate credit facilities. The company's liquidity policy is to maintain sufficient liquidity to meet its obligations as they reach maturity.

The fair value of financial instruments

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

The fair value is the amount at which the financial instrument may change in ordinary transactions other than those determined by liquidation or forced sale. The fair values are obtained from quoted market prices or cash flow models as appropriate. On 31 June 2017, the cash and other cash, the customers and the assimilated accounts, the trade payables and other payables are approaching their real value due to their short maturity. The management considers that the estimated value of these instruments is close to their carrying amount.

The capital risk management

The objectives of the company when managing the capital are to maintain the company's ability to continue operating in order to obtain benefits for shareholders and other stakeholders and to maintain an optimal capital structure in order to reduce the cost of capital.

Accounting for the effect of hyperinflation

In accordance with IAS 29 and IAS 21, the financial statements of an entity whose functional currency is the currency of a hyperinflationary economy shall be presented in the current measurement unit at the balance sheet date (non-monetary items are restated using a general price index from the acquisition date or contribution).

According to IAS 29, an economy is considered to be hyperinflationary if, in addition to other factors, the cumulative inflation rate over a three year period exceeds 100%.

The continued decrease in inflation rate and other factors related to the economic environment in Romania indicate that the economy whose functional currency was adopted by the company has ceased to be hyperinflationary, with effect on the financial periods beginning on 1 January 2004, thus IAS 29 was adopted in the preparation of the separate financial statements until 31 December 2003.

Thus, the amounts expressed in the current measurement unit at 31 December 2003 are treated as the basis for the carrying amounts reported in these separate financial statements and are not valued, replacement cost, or any other measurement of the current value of the assets or prices at which the transactions would happen at this time.

For the purpose of preparing the separate financial statements at 31 December 2012, the company adjusted its share capital (non-monetary item) to be expressed in the current measurement unit at 31 December 2003.

Tangible assets

The tangible assets are assets that: are held by an entity for use in the production of goods or the provision of services to be leased to third parties or to be used for administrative purposes and are used for a period longer than one year .

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

Purchase costs include purchase price, import taxes and other taxes (except those that the legal entity can recover from the tax authorities), transport, handling and other expenses that can be directly attributable to the acquisition of those goods.

The valuation of property, plant and equipment at the balance sheet date is carried at cost, less depreciation and accumulated impairment adjustments, or revalued, being the fair value at the revaluation date, less any cumulative subsequent depreciation and any accumulated impairment losses.

Damping times are as follows:

Buildings and construction	40-60 years
Equipments	15-40 years
Means of transport	5-8 years
Office furniture and equipment	3-5 years

Intangible assets

An intangible asset is an identifiable, non-cash asset with no material support and held for use in the production or supply of goods or services to be leased to third parties or for administrative purposes.

An intangible asset fulfills the criterion of being identifiable when:

- is separable, it may be segregated or divided by the entity and sold, transferred, authorized, leased or exchanged either individually or together with an appropriate contract, identifiable asset or identifiable debt, or deriving from contractual or other legal rights, whether those rights are transferable or severable by the entity or other rights and obligations.

The intangible assets acquired by the company are stated at cost less cumulative depreciation and provision for depreciation of intangible assets. The amortization is recognized in the income statement on a straight-line basis over the estimated useful lives of intangible assets.

Receivables

The commercial receivables are initially recorded at the invoiced amount and subsequently those in foreign currency are valued at the exchange rate communicated by the National Bank of Romania on the last banking day of the month. A depreciation provision is made when there is a clear evidence that the receivables will not be collected at the set time.

Stocks

The stocks are made up of:

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

- raw materials, materials, spare parts and other consumables to be used in the course of the company's core business.

These materials are recorded as stocks at the time of purchase and are expensed at the time of consumption.

The stocks are measured at the lowest cost and net realizable value. The cost of inventories is determined based on the FIFO method and includes the expense incurred in purchasing the stocks.

Money availability

The cash and cash equivalents include house, current accounts, bank deposits, meal vouchers, stamps and checks and promissory notes received by the company.

The revaluation reserves

After the recognition as an asset, an item of property, plant and equipment whose fair value can be measured reliably, it is accounted for at a revalued amount, that is its fair value at the revaluation date minus any subsequent accumulated depreciation and any accumulated impairment losses. To be done with sufficient regularity to ensure that the carrying amount does not differ materially from what would have been determined by using the fair value at the balance sheet date.

If the carrying amount of an asset is increased as a result of a revaluation, this increase should be recorded directly in equity in the item "Revaluation reserves". However, the increase is recognized in profit or loss to the extent that it compensates for a decrease in the revaluation of the same asset previously recognized in profit or loss.

If the carrying amount of an asset is impaired as a result of a revaluation, that decrease is recognized in profit or loss. However, the impairment should be debited directly from equity to the item "Revaluation reserves" in so far as there is a credit balance in the revaluation surplus for this asset.

The revaluation surplus included in the equity of an item of property, plant and equipment is transferred directly to the retained earnings as the revalued tangible assets are depreciated and when the asset is recognizable.

Starting from 1 May 2009, the statutory reserves from the revaluation of fixed assets, including land, after 1 January 2004, which are deducted in the calculation of taxable profit through tax amortization or disposal costs and /or tax at the same time as the deduction of tax depreciation, respectively at the time of decrease of these fixed assets.

Statutory reserves from the revaluation of fixed assets, including land, made up to 31 December 2003 plus the portion of revaluation made after 1 January 2004 for the period ending 30 April 2009, will not be taxed at the time of the transfer to the reserves representing the surplus realized of the revaluation reserves.

The reserves made are taxed in the future in the event of a change in the destination of the reserves in any form, in the event of liquidation, merger, including its use to cover the accounting losses, except for the transfer after 1 May 2009, of the reserves for the evaluations made after 1 January 2004, which are taxed at the same time as deducting tax depreciation.

Social capital

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

The company recognizes the changes in the share capital under the conditions provided by the legislation in force only after their approval in the General Meeting of Shareholders and their registration with the Trade Registry Office.

Dividends

The dividends are recognized as a liability in the period in which their allocation is approved.

Suppliers and assimilated accounts

The debts to suppliers and other debts include the value of the invoices issued by suppliers of manufactured finished products, executed works and services.

Loans

The loans are initially recognized at fair value, net of transaction costs. Subsequent to initial recognition, the loans are recorded at amortized cost, any difference between cost and reimbursement being recognized in the income statement over the period of the loan.

Profit tax

The profit tax expense comprises current tax and deferred tax. The current and deferred tax is recognized in the income statement unless it is recognized directly in equity or other comprehensive income.

Current tax

The current tax is the tax that is expected to be paid or received for the taxable income or deductible loss incurred in previous years using tax rates adopted or largely adopted at the reporting date and any adjustment to the related tax liability payable of previous years.

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

Deffered tax

The deferred tax is recognized for the temporary differences that occur between the carrying amount of assets and liabilities used for the purpose of financial reporting and the tax base used for the tax calculation.

The deferred tax assessment reflects the tax consequences that arise from the way the company expects to recover or settle the value of its assets and liabilities at the end of the reporting period. The deferred tax assets are reviewed at each reporting date and are diminished to the extent that they are which is no longer possible to achieve the related tax benefit.

Benefits of the employees

Benefits of short-term employees

The obligations on short-term benefits are assessed without being updated and are recognized as expenses as services are rendered. A provision is recognized at the amount that is expected to be paid for short-term benefits in the form of bonuses or employee participation in profit only if the Company has a present, legal or constructive obligation to pay that amount for past service provided by employees, and this obligation can be estimated at fair value. The benefits of short-term employees are mainly payroll.

In the normal course of business, the company makes payments on behalf of its employees to the pension fund. All the company's employees are members of the Romanian State Pension Plan.

Funding costs

The company does not capitalize the cost of the loans because it does not have long-term loans.

The interest income and interest expense are recognized in the income statement when they are paid.

Subsidies

The subsidies are initially recognized as prepaid earnings at fair value when there is reasonable assurance that they will be received and the company will comply with the grant-related conditions and then are recognized in the income statement as other income over the life of the asset to which it refers. The subsidies are related to assets. The non-reimbursable funds are recognized as assets when there is reasonable assurance that they will be received and the related conditions will be met.

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

Provisions

A provision is recognized at that time and only when the following conditions are met: the company has a current (legal and implicit) obligation as a result of a past event, it is probable (more likely than unlikely) that an outflow of resources representing economic benefits to be required to settle the obligation, when a fair estimate of the amount of the obligation can be made.

Output per share

In accordance with IAS 33 "Earnings per share", the earnings per share is calculated by dividing the profit or loss attributable to the company's shareholders to the weighted average of the outstanding ordinary shares of the period.

The weighted average of shares in circulation during the exercise is the number of shares at the beginning of the period, adjusted by the number of shares issued, multiplied by the number of months in which the shares were in circulation during the exercise.

The dilution is a reduction in earnings per share or an increase in share losses resulting from the convertibility of convertible instruments, options or warrants are exercised or ordinary shares are issued subject to certain specified conditions. The diluted earnings per share object is consistent with that of the basic share result, namely, to evaluate the interest of each ordinary share in the performance of an entity.

Contingents

The contingent liabilities are not recognized in the accompanying financial statements. These are presented if the outflow of resources embodying economic benefits becomes possible and not probable.

A contingent asset is not recognized in the accompanying financial statements but is presented when an economic benefit is probable.

Reporting on segments

A segment is a distinct component of the company that provides certain products or services (segment of activity) or provides products or services in a particular geographical environment (geographic segment) and which is subject to risks and benefits different from those of other segments.

The company carries out its operations in a single location in Romania. The company's management considers all of their operations as "one segment".

Operating segments are examined in a consistent manner by the entity's principal operational decision-maker for making decisions about segment allocation and performance appraisal, and for which distinct financial information is available.

An entity must report revenue from external customers for each product and service, or for similar products or services, unless the required information is not available and the cost of developing it would be excessive, in which case it should be disclosed. The reporting must take into account the financial information used to prepare the entity's financial statements.

SC ARTEGO SA

Explanatory Notes drawn up at 30 June 2017

(All amounts are expressed in RON, unless otherwise specified)

Implications of the new International Financial Reporting Standards (SIRF EU)

New standards and interpretations as approved by the European Union

A number of new standards, amendments to standards and interpretations are applicable to annual periods beginning on or after 1 January 2012 and have not been applied in the preparation of these separate financial statements. None of the new standards expects to have a material effect on the company's financial statements.

New standards not yet applicable on 30 June 2017

International Accounting Standard (SIC) 19 (2011) Employee Benefits (effective for periods beginning on or after 1 January 2013).

This amendment is not relevant to the company's financial statements, as the company's current policy is to immediately recognize earnings and losses in the income statement.

Fiscal legislative framework

The legislative and fiscal framework in Romania and its implementation in practice are frequently changing and subject to different interpretations by various control bodies. The business tax returns are the subject of revision and correction of tax authorities, generally for a period of five years after the date of their completion. The management considers that it has properly recorded the tax liabilities in the attached financial statements, however, there is a risk that the tax authorities will adopt different positions regarding the interpretation of these issues. Their impact could not be determined at this time.

Guarantees

The Company, on 30 June 2017, mortgages the following assets in favor of the financing banks to which it has committed credit lines as follows:
